

Final Project Proposal

AME494 - Programming for the Internet of Things

Abbie Jackson & Tina Truong

Task or Problem Being Solved.

Rather than addressing a specific issue, our project is tasked with the objective of answering its user's questions in a humorous way by responding with only *yes* or *no*.

Trade-Offs.

Users cannot input more than *yes* or *no* questions.

Expected Challenges.

We expect to run into coding errors, and AWS not working properly.

Tech Stack Being Used.

HTML, CSS, JS, VSCode, Arduino

Components and Interactions.

Task Timeline.
